INTRODUCTION

If your buttons are sticky, the numbers are worn off, or the keypad is malfunctioning, simply clean or replace it.

TOOLS:

- [iFixit Opening Tools](#) (1)
-

Step 1 — Battery

- Be sure cell phone is off before you begin to disassemble the phone.
- Press the button on the bottom of the back of the cell phone.
- Slide rear panel down and remove it.

Step 2

- Using your fingernail, pry the back of the battery upwards and pull out.

Step 3 — Faceplate

- Insert the plastic opening tool under the faceplate.
- Separate the faceplate from main body by twisting the prying tool with some force.
- The faceplate is held by three plastic fasteners, so pry evenly on both sides of phone.

Step 4 — Keypad

- With the faceplate removed, simply peel off rubber key pad and remove.

To reassemble your device, follow these instructions in reverse order.
